Sonix™ PA/GA rack

Overview

The Sonix™ PA/GA Rack is a special design modular cabinet suitable for virtually all networking technology requirements. It assures scalability and flexibility for ever-changing configurations.
Available in stainless steel material, this rack is designed for easy access, easy configuration and easy installation; it includes stainless steel or glazed front door with 180° hinges, comfort handle and security lock. Different cabinet sizes are available.

The rack is designed for high load capacity and variable interior installations, with adjustment of the 19˝ mounting levels.

It assures easy installation of system accessories (shelves component, cable conduits, etc.) and intelligent cable management.

Different variants are available (front door, cabinet height and Ingress Protection). Standard frame colour is grey RAL 7035.
